

When staff are notified in the Staff App

Every point at which a worker gets a push notification: from the first invite to the check-out reminder, plus documents, changes and removals.

All times UK time

Push, works with the app closed

Source: Scope v1.6 §7 and §8

1 The short version

1 · Invited

Auto-assign each hour at :17, or the office invites by hand (immediately).

2 · Asked to confirm

Day before from 08:00 (deadline 12:00), then again on the day.

3 · Removed

Missed the 12:00 deadline, office withdrew them, event cancelled, or role filled.

4 · Shift changed

Time, venue or dress code changes, sent the moment the office saves.

5 · Shift day

Check in, break and check out reminders.

6 · Documents

Expiring, expired, rejected, unblocked; weekly hours limit changes.

Workers are **not** notified about pay, or about an old invitation that expires by itself.

2 Every worker push at a glance

CODE	MOMENT
N1 N2 N3	1 month / 2 weeks / 1 week before a document expires
N4	Document expiry day, with the block
N5	Invited to a shift
N6 / N6b	Day before from 08:00 / removed at 12:05
N7	Shift day from 09:00 until 30 min before start
N8	Document rejected
N9 / N9b	30 min before start and end / 30 min after end
N10 N10b N10c N10d	Radar accepted / withdrawn from shift / role filled / invitation withdrawn
N11 N11b	Time changed / venue or dress code changed
N12	Event cancelled
N13	6 hours on shift with no break
N14 / N15	Weekly limit changed / unblocked after declaration
OM1	Office message to the line-up

3 One shift, from invite to check-out

Per role, not per event. Every shift-day timing uses that role's own start and end time. An early Chef section and a late Waiting Staff section are reminded separately.

4 Changes and removals, sent immediately

TRIGGER	WHAT THE WORKER GETS	CODE
Start or end time changed	"Shift time changed — now [new time]". Must re-confirm.	N11
Venue or dress code changed (time unchanged)	"Shift details changed — [what changed]. Please confirm in the app."	N11b
Office presses Withdraw on a confirmed worker	"You've been removed from [event] · [date/time]"	N10b
Office presses Withdraw on an open invitation	"Your invitation to [event] · [date/time] has been withdrawn."	N10d
Event cancelled by the client	"This event has been cancelled". Reaches Confirmed, Invited and pending Radar applicants.	N12
Radar applicant becomes Confirmed	"You're booked! Your application for [event] on [date] has been accepted."	N10
Role fills while an application is pending	"Shift update: the [event] shift on [date] has now been filled. Keep an eye on Radar."	N10c

Office message from the event board	The office's own words, headed <i>event · date</i> (changed entrance, parking, what to bring).	OM1
-------------------------------------	--	-----

5 Documents and compliance

TRIGGER	WHEN	CODE
Document expiring	1 month, 2 weeks and 1 week before expiry: "Update your [document] — it expires on [date]"	N1 N2 N3
Document expired	Expiry day , with the automatic block. Removed from future shifts, invitations withdrawn: "You have been blocked — please update"	N4
Document rejected	The moment the office rejects it: "Document rejected — [reason]. Re-upload." (with a Re-upload button)	N8
Conviction declaration accepted	When the manager verifies it and the compliance re-check passes: "Your shifts are open again."	N15
Weekly hours limit changes	Morning the change takes effect, once per change: "Your weekly limit is now [20 / 48] hours — [term time / university holiday] until [date]."	N14

The daily compliance job runs at **05:00 UK** and sends N1–N4 and N14. A university completion letter also notifies on **upload** (hours unchanged until checked) and on **approval** (new limit and start date). A rejection uses N8.

6 Candidates in onboarding

TRIGGER	WHEN	CHANNEL
Accepted after interview E3	On acceptance, the only mandatory system email	Email
Rejected after interview E2	On the rejection decision	Email
Quiz failed 3 times E4	On the third failed attempt	Email
Documents verified, quiz unlocks E12	The moment the quiz unlocks	Email
Chasers OC1 OC2 OC3	Daily , from a day after their last progress, 10:00–18:00 UK , until they act. Any progress restarts the count.	Email, then push

7 When a worker is not notified

- **Stale invitations / Radar applications** vanish silently once the event has ended (RULE-16).
- **Pay**: there is no pay notification in the register.
- **Already done**: no check-in reminder if checked in, no check-out reminder if checked out, no break reminder if a break started.
- **Their own actions**: cancelling their own shift, declining an invite or applying on Radar.
- **Notifications switched off on the phone**: nothing reaches them. Push is the main channel, so remind workers to turn it on (Staff App → Turn on notifications).

8 Proposed additions, awaiting THC sign-off

In the register but **not in scope v1.6**; wording still being agreed.

- **Request a change** (name or photo): "Profile updated" or "Change not made — [reason]".
- **Offer up a shift**: others get "Shift up for grabs" in hourly rounds; the taker gets "You're booked!"; the offerer gets "Shift handed over", "You're still booked" (lapsed) or "Cover request closed" (declined).

9 To confirm with THC

1. N6 starts at **08:00** the day before (scope says only “the day before”).
2. N7 starts at **09:00** on the day, earlier for early starts (scope says only “on the day”).
3. N4 wording: §8 says “You have been blocked — please update”; §4.2 says “...update your document”. The system uses §8.
4. N9 as one code or two (check-in half, check-out half).
5. Push titles are ours: the scope gives only the message body.

Go-live: nothing sends until the owner finishes the deployment steps (push keys, job functions, schedules). After that, each send goes through the outbox once with a unique key, so a re-run can never send the same notification twice.
